Closure Letter, and any conditional closure letter issued	<input checked="" type="checkbox"/>
Copy of most recent deed, including legal description, for all affected properties	<input checked="" type="checkbox"/>
Certified survey map or relevant portion of the recorded plat map (<i>if referenced in the legal description</i>) for all affected properties	<input type="checkbox"/>
County Parcel ID number, <i>if used for county</i> , for all affected properties	<input type="checkbox"/>
Location Map which outlines all properties within contaminated site boundaries on USGS topographic map or plat map in sufficient detail to permit the parcels to be located easily (8.5x14" if paper copy). If groundwater standards are exceeded, the map must also include the location of all municipal and potable wells within 1200' of the site.	<input checked="" type="checkbox"/>
Detailed Site Map(s) for all affected properties, showing buildings, roads, property boundaries, contaminant sources, utility lines, monitoring wells and potable wells. (8.5x14", if paper copy) This map shall also show the location of all contaminated public streets, highway and railroad rights-of-way in relation to the source property and in relation to the boundaries of groundwater contamination exceeding ch. NR 140 ESs and soil contamination exceeding ch. NR 720 generic or SSRCLs.	<input checked="" type="checkbox"/>

Closure Request Addendum, Attachment C
Soil GIS Registry Information

CD-ROM

Figure 3 is larger than 8.5 by 14 inches. Therefore, we have included a CD-ROM that contains a scanned pdf copy of all tables and figures submitted with the soil GIS registry information.

GIS Registry Fee

A soil GIS registry fee of \$200 was submitted to the Wisconsin Department of Natural Resources.

1. Property Deeds

A copy of the most recent deed for 26313 Burlington Road, which includes the legal description, is attached.

2. A Copy of Certified Survey Map

This requirement is not applicable because the legal description does not refer to a certified survey map or a recorded plat map.

3. Parcel Identification Number and WTM83/91 Geographic Coordinates

There is not a parcel identification number assigned this property.

The WTM83/91 coordinates were obtained at a scale of 1:809 using the WDNR RR GIS Registry on screen digitizing website. The property is larger than 200 feet wide or long so geographic coordinates for four points within the property boundary were obtained. They are as follows:

Southwest area point: 673247, 242334

Northwest area point: 673247, 242378

Northeast area point: 673297, 242379

Southeast area point: 673301, 242333

4. Site Location Map

The site location map is attached as **Figure 1**.

5. Map of Contaminated Properties Within The Site Boundary

A site plan (**Figure 2**) is attached.

6. Table of Soil Analytical Results

Tables required for the soil GIS registry are attached. They include **Table 1**-Soil Analytical Results Summary; **Table 4**-Vijay Soil Analytical Results; **Table 5**-SEI Soil Analytical Results and; **Table 6**-Soil Analytical Results of Excavation.

7. Isoconcentration Map

This requirement is not applicable because groundwater contamination does not exceed NR 140 standards.

8. Table of Water Level Elevations

Water elevations were measured one time in site monitoring wells MW1 and MW2 on April 10, 2002. The elevation of groundwater at the site based on these measurements and approximate site elevation is approximately 838 feet above mean sea level.

9. Map of Groundwater Flow Direction

This requirement is not applicable because groundwater contamination does not exceed NR 140 standards.

10. Map of Soil Samples and Soil Analytical Results Summary

Figure 3 (attached) shows the location and corresponding analytical results for soil samples collected during investigation and remedial action activities.

11. Geologic Cross Section

A geologic cross section as prepared by Vijay Environmental, Inc., is attached as **Figure 4**.

12. Statement Signed by Responsible Party

A letter signed by the responsible party/property owner stating that the deed and accompanying legal description for the property is within the contaminated site boundary is attached.

13. Copy of Letter(s) Sent by Responsible Party to Affected Property Owners

This requirement is not applicable for this site because the contamination is contained within the property boundary owned by the responsible party.

14. Copy of Written Notifications to City/Village/Municipal/Railroad

This requirement is not applicable for this site because the contamination is contained within the property boundary owned by the responsible party.

RE: Final Closure

Commerce # 53139-9999-57 WDNR BRRTS # 03-30-108814
Bong State Recreation Area Facility, 26313 Burlington Road, Kansaville

Dear Mr. Rehlinger:

The Wisconsin Department of Commerce (Commerce) has received all items required as conditions for closure of the site referenced above. This case is now listed as "closed" on the Commerce database and will be included on the Wisconsin Department of Natural Resources (WDNR) Geographic Information System (GIS) Registry of Closed Remediation Sites to address residual soil contamination. It is in your best interest to keep all documentation related to the environmental activities that were conducted.

If residual contamination is encountered in the future, it must be managed in accordance with all applicable state and federal regulations. If it is determined that any remaining contamination poses a threat, the case may be reopened and further investigation or remediation may be required.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (414) 220-5361.

Sincerely,

A handwritten signature in cursive ink that reads "Monica L. Weis".

RE: **Conditional Case Closure**

Commerce # 53139-9999-57 WDNR BRRTS # 03-30-108814
Bong State Recreation Area Facility, 26313 Burlington Road, Kansasville

One 500-gallon diesel and two 1,000-gallon gasoline underground storage tanks removed July 10, 1992

Dear Mr. Rehlinger:

The Wisconsin Department of Commerce (Commerce) has reviewed the request for case closure prepared by your consultant, BT², Inc., for the site referenced above. It is understood that residual soil contamination remains on-site. Commerce has determined that this site does not pose a significant threat to the environment and human health. No further investigation or remedial action is necessary.

The following condition must be satisfied to obtain final closure:

- All groundwater monitoring wells must be properly abandoned and the appropriate documentation forwarded to Commerce at the letterhead address.

This letter serves as your written notice of "no further action". Timely filing of your final PECFA claim (if applicable) is encouraged. If your claim is not received within 120 days of the date of this letter, interest costs incurred after 60 days of the date of this letter will not be eligible for PECFA reimbursement.

Thank you for your efforts to protect Wisconsin's environment. If you have any questions, please contact me in writing at the letterhead address or by telephone at (414) 220-5361.

Sincerely,

Monica Weis

Dear Ms. Weihemuller:

The purpose of this letter is to satisfy a requirement for including this site on the WDNR GIS registry of closed remediation sites. To the best of my knowledge, I believe that with the submittal of the enclosed property deed and accompanying legal description that each property within, or partially within the contaminated site boundary has been included with the closure request. The property deed included is for the Bong State Recreation Area, 26313 Burlington Road, Kansaville, Wisconsin. The legal description for this property is written on the enclosed property deed.

Sincerely,

Chris Rehlinger
